

Colin M. Coyle, AIA
Consulting Principal, US Public Sector
HP Technology Consulting & Critical Facilities Services
106 New Market
Williamsburg, VA 23188

Colin M. Coyle, AIA leads US Public Sector (USPS) Programs for HP's Technology Consulting and Critical Facilities Services (CFS), delivered by EYP Mission Critical Facilities® (EYP MCF). In this role, Colin is responsible for the expansion of the public sector market sector for HP's consulting practices in Critical Facilities, Networking, Storage, and Education services.

With a singular focus on highly reliable and energy efficient facilities and infrastructure for critical missions, HP CFS specializes in the consulting, design, assurance, and implementation of data centers, command and control (C4ISR) facilities, and DR/COOP structures. HP acquired EYP MCF with a keen eye toward advancing data center consolidation and transformation for its customers. EYP MCF had been integral to HP's success in consolidating its own enterprise data center portfolio from over 89 global facilities down to a network of six interdependent and highly reliable and efficient facilities. This transformation has resulted in a 50% reduction in total IT spend, with similar scale reductions in workforce, network/software platforms, and energy consumption. CFS carries forward this mission, and working with HP labs has advanced the evolution of the data center building type and practice through the industrialization, containerization, and modularity of data center facilities; advances in energy control, monitoring and conservation; multi-tier typologies, facility accommodation of high performance, high density, and cloud computing platforms; and new offerings in trusted advisor and turnkey/privatized implementation.

Colin comes to EYP MCF with a proven track record of success in building public practice areas for some of the country's largest and most successful A/E/C firms like KBR/Halliburton, HLM/Heery, HDR, and HNTB. He has over 25 years experience in government contracting and procurement and has managed and led capture efforts on design, construction, and development engagements well into the billions of dollars on large programs and public-private partnership initiatives. As such, he is a known and respected leader in government procurement circles nationally among the Top ENR architecture, engineering, and program/construction management firms, as well as by public sector agency managers.

Mr. Coyle is a registered professional architect and holds a bachelor of science in architecture from the University of Virginia. His professional affiliations include the American Institute of Architects, the Society of American Military Engineers, 7x24 Exchange, the Real Estate Group of Greater Washington, and the Coalition for Government Procurement. He holds a Secret Level Security Clearance.
