

Ross Rebraca, Professional Biography

Ross has 30 years of experience in the Mission Critical Industry. He has worked in all aspects of the industry given he started with Emerson Industries (pre-Liebert acquisition) as a UPS service technician and also worked in their customer training department. From there he went to MCI Telecommunications for the majority of his professional career in their Technical Facilities Design and Construction department as a Project Engineer and later department Manager. He has also worked at Lee Technologies on the equipment sales and service side and also at U.S Customs and Border protection as a Technical Facilities Manager insuring 100% uptime at that critical government data center.

Currently Ross is Director of Technology at HITT Contracting, Inc since 2006 where he has been instrumental in starting this sector within HITT which is responsible for all data center construction. He is responsible for all technical aspects of the projects including equipment selection/review and commissioning coverage. Ross also handles the majority of Business Development for the group given his long and numerous industry contacts in the DC area and nationally.
